

GOD TABOR'S DISCOURSE

WASHINGTON, D. C. — JUNE 4, 1939

SAINT GERMAIN

I TAKE this opportunity, beloved students, to thank you of Washington, D. C. for holding This Light as steadfast as you have, in the midst of the conditions that have been, but which I feel sure, they will be no more. I thank every student here for the change in each one's feeling that makes for one great body of Light, and it is so important here in your Capital, beloved students.

Do you realize you are quite different from any other city in the land? You are under different laws, and yet you are all under the Great Divine Law. I want you to feel My Appreciation; and I say to you here and those in Philadelphia, New York City and Cleveland, I shall move once a week in your midst during the next six months; and I will move in New York City and here many times in My Tangible Body, to release greater Power and Force which is needed.

If New York—and I am not speaking now of the very earnest sincere students, but if the people of New York do not want to be saved, then I want to save them. I insist that those destructive conditions can be corrected in New York, without the destruction of half or all the city. The earnest honest sincere effort which has been made by those lovely sincere students in New York is not going to be in vain.

I want to thank those beloved ones in Cleveland for the mighty power and firm unyielding stand which they have held to the Light. While you are not looking for reward, yet shall your reward be very great.

You of Philadelphia who first welcomed the Messengers, do you think We have forgotten that! Do you think We shall ever forget it? Oh no, We are just bidding Our Time! Be patient until you shall see sweep thru your city that which will cause your hearts to rejoice! I thank the beloved students there who have been willing to bring themselves into harmonious action and join in their great call and happiness to unite all!

Philadelphia, please feel your very great responsibility. You have been calling yourselves the “Cradle of Liberty.” It is no longer a cradle, it has grown to full manhood. Remember that Liberty of which Philadelphia was once the Cradle is no longer a Cradle; but it has grown into full power; and remember, within those boundaries of the Province of the Wissihikan was given the blessing, the anointing of your great great General which brought Freedom to your America. I was there, the Goddess of Liberty was there, even then guarding you. Many of you were embodied then and returned quickly to render this service today. I wish you would remember it.

You who are drawn to This Light, remember—it is not an outer action of Life, my dear ones, but by the

Power of the Light which is within you, it has drawn you back again to Me. You who served in that early Freedom, Oh what rejoicing that now you are serving in the final capacity—Action of Light. That was for the Freedom and the outer activity of mankind to establish certain definite laws under which they might act; but now you are acting in the capacity of Light in the Divine Law, which will one day take Its Full Command of your land, of your bodies, of your minds and activities; and which will bring happiness and Perfection, health and prosperity to your land.

I ask you to kindly listen carefully to the One who shall dictate to you tonight. Try to feel all that it means to you. I thank you beloved students with all My Hearts. Did you notice that! I said—"with all My Hearts." Are you not My Hearts? At least I love to think of you as My Hearts. Your Love to Me surely makes you a part of My Heart.

The Mighty Tabor will speak to you!

MIGHTY GOD TABOR

STUDENTS of the Light, friends of America; tonight, for the first time, comes into action that Power of Nature which must take its action in the coming change, even in the consciousness of mankind. Since I have a large part to do, in regulating the forces and activities of the mountains and the deserts, tonight I want you to see, perhaps for the first time, what the statement so often made that one day "the desert shall become a bed of roses," means.

In the coming changes, beloved students, Nature will take a great part in the regulating of that which will bring the desert into great productive power. Once it was very wonderful, and thru chemical changes by the
