

ROYAL TETON

New Year's Day, 1968

Beloved Cyclopea

*N*ow in the Activities that took place at the Royal Teton last night, We have focused into the atmosphere over this Nation a certain Activity of the Crystal Rays; and They are to a very large degree Protection. But They are also established to cut through the substance and the destructive activities of the energy released through war and through hate and destructive feeling that mankind has generated through outer world conditions.

The Crystal Ray, as It goes through, cuts a Pathway through the accumulation of discordantly qualified substance and the whirling activities of energy that have been charged with destruction, charged with hate, anger, and every discordant feeling—charged with impurity. Now when the Great Cosmic Law has permitted Us to draw these Activities into the atmosphere over the Nation, you must realize it is for a certain sense of security, and in order to consume a certain proportion of the discord in the atmosphere over this Nation. That is Our Opportunity to take away the accumulating substance which, if it joins what's in the rest of the world or is not taken away, becomes the pressure of the third world war, or your activities of atomic energy and so on that only produce destruction.

We would love to have you call to the Seven Mighty Elohim of Creation to ask Us to call forth whatever We know purifies the atmosphere over this Nation and makes it eternally Divine. Now this would be the establishing of certain Activities of the Sacred Fire in the atmosphere over the Nation. It will not only be Protection, but It will be the sustaining Power of what is constructive within this civilization in this Nation. It will be the sustaining Power as well as the Protection of everything that is constructive within the Nation, and if you care to make the Call to make everything Divine in the atmosphere of this Nation, you will give Us an Opportunity to do that which only the Sacred Fire can do, that is drawn from Our Ascended Master Octave.
