

## TEMPLES

### *Angel Deva of the Jade Temple*

**Y**ou often wonder where We are and where Our Temples of Light are—Our Temples of the Sacred Fire. You wonder where We abide. You wonder many things about Us, all of which can be revealed and will be revealed at the appointed time; for there is an appointed moment wherein the Light within the individual, as It expands, is given the Freedom through the outer self to fulfill the Great Divine Plan and raise the outer self into greater Perfection. But to give you some idea of what the Service of Life and the Great Divine Plan of Perfection contains, I wish you to understand that in the Electronic Belts around the Physical Sun and the Great Central Sun abide Our Temples of the Sacred Fire, each one of which is composed of a tangible Substance, much finer, of course, than anything in your physical world of which you are aware. But the Temples of the Sacred Fire in the Electronic Belts around the Physical Sun and the Great Central Sun, those Temples are the Focus of special

Activities from the Great Central Sun that are established and are continually pouring Their Perfection of Life into this world and this System of Worlds. . . .

Just the same as you have your homes in this world, We have Our Temples of the Sacred Fire. They are Our Focus of Power. They are Our Gifts and Activity of Perfection to Life, and They are designed and charged with whatever We wish to use for any special Service We give. Now the Mighty Saint Germain told the Messengers in the beginning of this Instruction that when any one of the Ascended Host is rendering a certain Service to this world, or any world in this System, many times those Temples are created—you might say, created of Jewels of various Qualities and Intensities of Light and the Sacred Fire. Then for any special Service that the Master wants to render, the color of those Jewels is changed, depending on the Quality the Master wishes to draw into the planet where the Service is being given.

This is one of the most fascinating things you can possibly contemplate; and only Love can take you there and make you understand what Love alone can create, and why It never creates anything but Happiness. In the magnificent Decoration of those Temples, where you have windows and doors, We have openings, too. They are festooned by flowers composed of Fire, each petal a Flame on the outer edge, that breathes constantly. And as It breathes, It pours forth the Love of Its Quality into the atmosphere; and then that can be concentrated and projected wherever We direct It. This is part of the Perfection of Life into which you come once you become Ascended. So I am giving you just a peep, tonight, into the place where I hope you will come!
