

Expansion Of This Light

Angel Deva of the Jade Temple

Beloved Ones, since your city here has been chosen by the Great Ascended Host who govern this world as a definite Focus for future accomplishment, then We draw the Substance and the Sacred Fire here by which that accomplishment becomes manifest. Now there is a reason why this locality renders certain Service, because it has been a Focus for many centuries past of a similar Activity of Perfection. And each time that Perfection comes forth, It is expanded until It reaches Its Eternal Manifestation of Happiness and Glorifying Activity that is the Action of the Divine Plan and Its Fulfillment. This is the fifth city that has been built on this location of the Earth's surface, and thousands of years have intervened between the establishment

of these cities. And yet the Focus of the Sacred Fire which has maintained the Power that has drawn forth these cities in each age to manifestation, still rules and will still bring to Perfection that which is to be expressed here for all time in the future.

So you are the builders of the Incoming Perfection; and We give you a little bird's-eye view into the future, that you may more deeply appreciate the Blessings of the present. And since one of those Blessings is the beginning of the purifying of your atmosphere here, the Sacred Fire is an essential part of that Purification. As you keep on demanding the Forced Purification of all that comes to your attention, the Cosmic Law is set into action, and the Manifestation of that Purity must appear as the Concentration of Its Energy reaches a certain point. So this city (*Chicago*) is ultimately to be a Sacred City. (*applause—audience rising*)

Now this Inner Perfection to which I have referred has gone on through the centuries and will eventually blossom into that which is Eternal. Just as that has gone on inwardly in this location, it is similar to the way this Class Work has gone on in this building. And the Light, the Blessings We have offered here during the Classes in this building—the Light has gone on and done Its Work; and yet those in the rest of the city, while they are here, have not known It. . . . And just as you have abided in this city and the masses of the people know not the Light that has been given here, so does this Inner Sacred Fire that is anchored from the Central Sun into the Heart of the Earth at this place—has It gone on through the centuries.
