

## Nature

---

### Beloved Oromasis

---

**I**t might be of interest to you to know that where individuals have lost the physical sight, the Life within the individual projects a substance on the ends of the fingers—and people begin to see through the hands, through their feeling, just as surely as they saw through the substance of the eyes when the sight was there.

Now the Higher Mental Body, through the feeling, makes the sight act. It makes the hearing act. It makes the other senses act. They are the attributes—they are the Powers of the Flame, the Unfed Flame of your own Higher Mental

Body. And therefore, within that Flame are all the Powers of Life, all the Power to produce Beauty and Perfection to heal, to purify, to correct mistakes, to supply every good thing, to hold Perfect Balance, to fulfill the Divine Plan, to establish Happiness, and then command It to grow and hold It protected while It is growing.

Think you, Precious Ones, the Power that is within Life! You don't realize this because you do not stop to think deeply upon these things long enough. A tiny seed almost infinitesimal in size, dropped in the crack of a giant rock in a mountain, through the energy of the Sun and the energy in the rain begins to grow, and the power in that tiny plant as it grows greater and greater, can split the side of the mountain off. That's the Power in Life. That's the Power in the Sacred Fire. That's what is great in this Universe. That is the "Presence" to which I ask you to give credit.
