

## BELOVED MIGHTY NEPTUNE

**N**ow let Us take up the Power, the Spiritual Power in water that draws off from mankind the distress and the discord human beings have created by disturbed feeling. Every time you are weary and you place the body in water to rest within that, it draws off the weariness. It dissolves that weariness, in other words. Therefore, there is within the Water Element the Activity of the Sacred Fire that continues to purify everything that is placed within it; and when individuals so unenlightened use the Powers of the mind and the energy of the outer self to construct

things that contaminate the water, only the Great Cosmic Law and the Great Cosmic Beings know how frightful is the crime against Life.

Individuals who create, by the misuse of the things of this world, the diabolical torture of Life through contamination of the water and the air and the other Blessings that Life and the Cosmic Law have placed in this world—surely you must realize that mankind, somehow, must be purified, and the Power is taken away from the individuals to any longer create the filth of destruction and torture to other parts of Life. When people become insane with the destruction of war and injure those who have never injured them, what think you is the penalty and the reaction for the misuse of the energy of Life? Now then, there is a Power which We can use, and it may become necessary to use It to draw a Light to the waters of the world and make them luminous. And when They do—mankind will stop its evil.
