

BELOVED LADY MASTER LETO

You accept water as just such a natural thing, but you do not realize that water is liquid electricity—and yet everybody knows it is a conductor of electricity. And its own purifying power is due to the electrons within it; and were you to ever realize and qualify the water that you put into your body each day as the liquid electricity of the Eternal Purity of the Cosmic Christ, you would find its beneficial effects within the body increased infinitely. It is your feeling about a substance and your interpretation of that, to yourself, that determines whether you receive all of the Powers of Blessing and Perfection within it or you only receive a few. It is your feeling about a condition that determines the quality that you accept. And you would be surprised—if every time you took a drink of water, you realized you were drinking liquid fire to purify the body, to energize it, to protect it, to pour forth through it the Purifying Manifestations of the Love of the Sacred Fire—you would illumine these bodies in no time!
