

# The New Year

## **Beloved Mighty Cyclopea Thou Great Elohim of the Sacred Fire**

Say to your “Beloved I AM Presence” and to Us: Give me what You know will set me free and keep me free from all that is discordant, all that is limited, all that is wrong in the physical octave! Give me what You know sets me free from the problems and the struggle of the human creation of this world! Whatever You give me, keep it Invincible against all wrong! My Dear Ones, We can surprise you in the most amazing ways that are perfectly safe. There will be no speculation in Our World. You can’t speculate when you deal with Us, because We are certain of what We can do—and the world of speculation isn’t in this world. You might have it today and lose it all tomorrow.

If you will try Me out, We would like to experiment with bringing into your outer use certain things that are going to be required in the new civilization and will be a blessing to all. We must have channels through which to bring those blessings; so if you care to experiment with this and ask your “Beloved I AM Presence” and Us to give you what It knows will set you free from the problems and limitations and the wrong of the outer world, then you stay with that and just pour your Love there.

Dear Hearts, as soon as you take your attention and your feeling off the channels of limitations and place it on the Unlimited, then We can fill you and your world with the Unlimited Perfection of Ours, the Never-ending Perfection. Whatever you call forth, whether It be in this world or the Ascended Masters’ Octave, before you make the Call, demand that it be kept eternally untouched by anything wrong. You must do this in order to build your Protection around what you are going to use in the future, so you can maintain it for use. You might have something today; and if somebody takes it away from you tomorrow, you are no better off than you were yesterday. So I trust as We enter into the New Year, you will experiment with this new Channel of Supply; and I would like to experiment with some surprises for you—if you care to experiment.
