

BELOVED NEPTUNE'S DISCOURSE

Through Mrs. G. W. Ballard

On board ship—Princess Marguerita

Victoria, B. C. to Seattle

June 14, 1949

BELOVED ONES, it is with great Joy that I take advantage of this opportunity to bear to you the Love of those Beings of My Element, who love to serve you, and who will yet bring you some of Their Choicest Gifts.

I am explaining to you the change of the Currents, the Magnetic Currents of Energy when you float upon the water, which are different from walking on the Earth. When you walk upon the Earth, the Currents of Magnetic Attraction which are within your own Life Stream become fastened into the substance of Earth. They send down their Currents of Energy and Vibratory Action to bless not only the Beings of the Elements, but the structure of Earth itself, and to pour your Light into the Currents which pass through the crust of the Earth as your veins of blood pass through the body.

When you are on the water a similar thing takes place, except there enters into the Water Element your own activity, because your emotional body is composed of Its Essence. There enters in an Activity of the Purifying Power of the Great Love from the Great Central Sun! It is very much easier to handle, because it is not so dense as many of the conditions in the structure of the Earth. That is why when individuals like a boat trip for rest and relaxation, they are really surrounded by very much greater Purity of the water than on the landed surface of the Earth, at least to a large degree.

Water is in reality Liquid Electricity of not too high a potentiality. Yet in its wonderful energizing quality, you also find it purifying the element of the emotional body. You find it has great Purifying Radiation to the etheric substance and to the mental body. That is why you can feel mental relaxation on the water very quickly.

If I could have a group harmonized sufficiently, so there could be no discord or feeling of battle between individuals for a while, I could take you on the waters of the Planet under very favorable weather conditions, and I could make you feel the electronic force in the various currents of intensified energy which play through the general Water Element. In every portion of the World, nearly, there are certain Gulf Streams and Currents within which some of mankind are safe and some they are not. That is due to the Conscious Direction of certain Rates of Vibration into the water under My Direction, and through Those who carry out My Will!

Much as mankind has contaminated the energy and Powers of Nature, yet even through the centuries the people have not been able to contaminate a large portion of the Water Element, because the motion within itself is to some degree an Action of the Fire Element, and the ceaseless motion in the water is its Purifying Action! That motion, My Dear Ones, is produced by a direct, consciously-drawn Projected Flame or Activity of the Sacred Fire from the Physical Sun. As It passes through certain parts of the Earth and certain Waters of the Planet, It keeps a concentrated Purifying Current of Electricity drawing the impurities into a certain focus, which We consume from time to time.

I want you to follow Me closely, because the Force which We direct into the Water Element—as well as the other Great Beings who direct this same Force through Their Element—is Electronic Force. It is the most wonderful Concentration of Purity. It is like Liquid Fire in reality, and wherever It passes, It compels whatever Element it passes through to become purified!

Just as you can take a container of water and, intensifying certain currents of electricity through it, you can compel every bit of impurity—everything in the water that is not just oxygen and hydrogen—to come into condensation and be driven off. When you are through, by this Current of Electricity you can have as a remainder, pure hydrogen and oxygen combined in the way which produces water.

Hydrogen and oxygen are both tremendous Activities of the Fire Element. Either one will cause fire to burn. When they are

combined in the proportion of two to one, they become what you call water, and yet that water is composed of two gases or Flames. I want you to see, know, and feel that *everything which is in manifestation has come out of the Sacred Fire; therefore, It is the most Powerful Consuming Activity! It is the most powerful Concentration of Energy! It is the most powerful means to produce manifestation.* Because of that, the Water Element Itself has certain wonderful qualities. It gives of Itself without any reservation. It is the most nonresistant Element and yet not exactly the most powerful, but next to the most powerful. *The Sacred Fire is the Master Element of all Creation!* Out of It comes what you call air, which is again the Radiation from the Universal Light-Substance.

Now follow: You have the Flame. Its first Radiation from the Great Central Sun is the Universal Substance of Light, which you see in the atmosphere—those tiny points or sparks of blue-white Fire, constantly giving off Their Radiation. That Universal Light-Substance is the first Radiation from the Sacred Fire. There comes forth from this Universal Light-Substance what you call the Air, the Element of the Air. It contains the etheric substance and the various finer substances which the scientific world speaks of as gas—in chemical terms. Then you have the action of those two together—the substance of Light, the Universal Light-Substance, and the so-called gaseous conditions in the atmosphere which combine to make your next element, water.

The Universal Light-Substance, which is electrons, is condensed into more and more solid concentrated action, which becomes what you call physical substance. That physical substance, the finer part of which We speak of as etheric, contains more of the Fire Element than what you know as actual physical substance, but the Master Element of Life is that Flame—*the Sacred Fire*—and It interpenetrates everything else! Therefore, since It is the Element which gives action to all the other Elements, then *It is the Controller of all concentration! It is the Controller of all qualities, and is the Great Heart Center of Creation.* It is the Activity of Life which constantly molds Universal Substance into the various Manifestations in the Universe around you.

The same thing is true in your emotional body as takes place

in the atmosphere of Earth or in a System of Worlds. If the atomic structure of the flesh seems dense to a certain degree, the Activity of the Sacred Fire, the Violet Consuming Flame, consumes the density and releases the energy of the etheric substance, which is really the finest part of the physical substance of your world. It enables the etheric substance to act with more Power of the Sacred Fire. It enables more Power of the Sacred Fire to come into the outer substance of physical things.

When the body becomes heavily congested with substance it cannot handle, so much so that it slows down the general activity of the outer self, mental lethargy comes on. Then Dear Ones, the Activity of the Sacred Fire from the Higher Mental Body is receding instead of coming forward to fulfill Its Divine Plan.

Now these Activities of the Elements are the same throughout Creation. If you concentrate the Activity of the Fire Element, you can drive It through all the other Elements. It takes the actual intensity of energy within the Sacred Fire Itself to concentrate the Electronic Force into the other Elements. So Its Flame is Paramount! If We turn your attention more and more to the Sacred Fire, it is because every time you turn your attention to It, We can bring more Intense Concentration of Its Electronic Force in and around you and your affairs, to help you do more quickly whatever produces Perfection.

If you understand how We always use some Activity of the Sacred Fire in all that has to be accomplished in the physical world, you know you can handle the things of this World by those same Activities of the Sacred Fire which you have been calling forth lately. This will bring you to the point where you do realize your "Presence" is a Being of the Sacred Fire, as is the Higher Mental Body also. Therefore you who make the Call can open the switch, so to speak, for the Currents of Energy and Power to flow in and correct a condition. If you tried to correct wrong conditions by just the physical force in the outer self, you would fail utterly. This is the difference between correcting conditions of the outer world by your Calls to Us and releasing the Power of the Sacred Fire, or moving into a condition with the desire of the outer self to correct it. When you try to correct physical conditions without

your Call, you have to use your own physical force to do certain things which it can only do imperfectly.

There is a great Peace, My Dear Ones, when the Water Element is calm in the oceans of the World or great bodies of water. When the water is stilled, so that it scarcely moves to any appreciable extent, you can absorb its energy through the optic nerve—just by looking at it. This shows you how powerful is the absorption into your bodies of whatever holds your attention!

As you use physical fire to burn up debris—things which are no longer of use and need purification—just so do We use Great Universal Light Rays and Concentrated Currents of Electronic Force in the Water Element. From time to time under certain conditions of Nature, We take advantage of Harmony when It is held by a few people for a certain length of time. Through It, We draw into the structure of Earth itself, a Permanent Stream of Our Cosmic Light-Substance and the Electronic Force which purifies all by Its own inherent Power of the Sacred Fire.

Regardless, Dear Ones, of all mankind has created of imperfection and impurity, driven into the Water Element of the Planet, the very action of the Electronic Force which compels the Water Element to keep in constant motion purifies it. Our Concentrated Electronic Force is the Purifying Action of the Sacred Fire—the Violet Consuming Flame, principally—by which outer conditions are compelled to be purified and raised into constructive action.

Were you to understand thoroughly the condition of your emotional bodies, as the Mighty Elohim of Peace showed you today, you could reach to His Flame and demand the outer self be compelled to feel It! You can on an instant enter into His World and feel the Peace which is the anchor to hold you perfectly steady in your outer activities, until Perfection is expressed to sustain the Happiness and Fulfillment of the Great Divine Plan.

In order to give you a certain Relaxation, I would appreciate it if only for one or two minutes, whenever possible, you would enter into a very still contemplation of the Feeling the Beloved Mighty Elohim of Peace gave you today—His Feeling of Absolute Purity in the Water Element of the Planet!

We mentioned this before, but the Pure Electronic Force,

which the Sun really is, combines oxygen and hydrogen in the atmosphere of Earth. As they condense to become the Water Element, It strikes the top peaks of the mountain ranges first. It enters into and speeds down until it enters into the rivers, the lakes and oceans of the Planet. Everywhere that water passes, it leaves some of its Electronic Force and builds It into substance wherever it flows. That is Its natural Cleansing, Purifying Activity from the Octave of Light.

You can just as well have this same Activity in the substance of your own mental and feeling world, as to have it act in Nature. Were the Intense Concentration of Pure Electronic Force—which is really condensed electricity—that takes place in the highest parts of the mountain ranges of the World, just poured directly to the World, the people could not stand It in the physical flesh body.

The sudden increase of vibratory action, when it enters in through the natural activities of rain and snow in the mountain peaks, brings a desire for Purity into the people. This Purity also enters into the formation of the minerals and this Purity enters into the other substance within the mountain ranges. As it continues to grow, you will find the Purity which mankind must have, becomes a thing desired by the masses of the people; then when their discord reaches a certain intensity, they won't tolerate it longer.

This great Purifying Action of the Sacred Fire, as the Mighty Saint Germain has told you, is the Violet Consuming Flame, and any Purifying Activity in the Water Element, you will find contains some Violet Flame Action. Therefore when the Violet Consuming Flame passes through the Waters of the Earth, It automatically consumes the substance which has been discordantly qualified.

I do not want to go into this very much, but when conditions in the body become congested to the point where the accumulation of substance blocks the flow of the Sacred Fire through the individual, you will always find a lack of the Water Element to hold balance in the body of the chemicals which form the atomic structure. As the Beloved Elohim of Peace told you today, His Feeling of Peace is the Balancing Electronic Force, or the Power which

holds all the Electronic Force of any constructive condition in balanced cooperation with the rest of the Electronic Force in the Universe.

In many people's emotional bodies, sometimes the strain has been so great, due to many things, that it forms an obstruction to the flow of the Heart Flame—the Love from the “Beloved Mighty I AM Presence” down through the Ray of Light into the Head and into the Heart. This is the cause of distress. That flow ordinarily is uninterrupted in childhood. Individuals in later years interfere with Its flow because they keep under tension, which will not let go of the substance already taken into the body that should circulate and be thrown off after it has served its purpose.

So in correcting some of the conditions of arthritis, paralysis, and such conditions that have almost engulfed mankind, there must come, Precious Ones, mental rest. The mind, which is another Action of the Fire Element, must be allowed to be still and purified. Its energy must flow through the outer self and release its Blessings and Perfection, just naturally, to hold things in Perfect Balance.

Mankind thinks it needs a great quantity of solid food, and yet over eighty percent of the body is pure water. Only twenty percent should be solid food, and if that twenty percent is exceeded, then somewhere it will be condensed and stored up, until something occurs to loosen it and throw it off. Doesn't it seem quite remarkable that after all these centuries of mankind's misuse of Life Energy and the frightful impurity poured into the Water Element of the Planet, people do not realize there is some great Activity of Life, some Activity of the Fire Element which is always burning up a certain proportion of mankind's impurities? Well, that which consumes a certain proportion of impurity is an Action of the Sacred Fire from the Great Central Sun interpenetrating the waters of the Earth. It is part of My Service to Life to direct water where it will compel the consuming of a certain proportion of mankind's impurity.

From the Inner Standpoint, Dear Ones, while it would take a great deal of energy, yet We could draw those Great Flames of Electronic Force from the Great Central Sun, or even the Physical

Sun, into many conditions of mankind's discord, and concentrate It to the point where the discord would let go very quickly. We could with a certain use of that Force consume, well, what you might call almost instantly, the pressure and accumulation in the mental and feeling world of mankind that keeps them from understanding the "Mighty I AM Presence" or understanding the Activities of the Sacred Fire.

Now isn't it terrific that mankind, who are Beings of the Sacred Flame from the Great Central Sun, could so far forget these Activities of the Sacred Fire that the masses of the people don't know anything of what We mean when We say "the Sacred Fire." To them it is just like a foreign language they have never studied, and yet all the time that Marvelous Activity of the Fire Element is interpenetrating everything to keep things purified and harmonized and protected and balanced—and that is My Individual Service, both through the Water Element and to mankind, in watching the energy of individuals go forth, and wherever possible consume the contamination.

There are some of the most Wonderful Activities of Life and Energy on this Planet that take place deep within the Water Element, and while We govern those very easily and We know exactly what goes on, yet that is a hidden book, a closed book to the mass of mankind. In the first place, they know very little about what is in the sea or the oceans of the World. They have made some explorations down to a certain depth, but could you see how much farther down the Water Element goes than to the level which mankind can investigate, you would understand there is an entire hidden realm of knowledge, deep within the Water Element, which none of mankind can explore—until We open the Way and give the Knowledge of the Sacred Fire. That is because of the proportion of the water on the Earth compared to the other elements! It does not take as much of the Fire Element to control conditions as it does the Water Element. When We call forth those Activities of the Sacred Fire from the Great Central Sun into any Element, or Its Beings, to control Its action and use It to outpicture the Perfection of which We speak, well then We can move Heaven and Earth, Dear Ones, to bring assistance to you.

Now regardless of what goes on around you, don't be concerned about it. We have given you much to overcome all conditions of the outer world, and I know while it has been a great avalanche of material, yet I see certain phrases or certain Decrees or Ideas being taken up by this, that, or the other Student—hungerly are they applying that to the conditions that limit them.

This is a very rare opportunity for Me to blaze through each of you the Powers of the Sacred Fire while you float insulated from the conditions of the land. Floating on the water, it makes certain things possible to Us, Precious Ones, that I wish you to understand, at least partially for the moment; and then to feel yourselves so much a part of It that wherever you move, Our Purifying Power can go forth through you to assist others, and Our Enfolding Flame stands around you to keep you untouched by the discordant conditions in which the rest of mankind function. You could be as you are now, at Peace with your attention upon Me, and therefore receiving into yourselves My Strength and Purity and Electronic Force of the Water Element, and yet around you, both on the boat and in the atmosphere, are these other conditions, these other rates of vibration, through types of consciousness, and yet they are not in your world. You are not disturbed by them, and really, they mean nothing to you when you enter deeply into this Knowledge.

So whenever there seem to be some problems to be handled in your feeling world, call to Me, because I do have something to do with the emotional body of everyone on this Earth. While I govern completely the Beings of the Water Element, yet your emotional body has within it the Beings of the Water Element, which your Higher Mental Body drew in and around you and formed your feeling world; and as I have said before and Others have said, when destructive forces find that a person's emotional body is off guard or the substance unguarded, it is no trouble at all for those destructive forces to suddenly drive a feeling of irritation into the energy of the individual's feeling world, and the only reason that is not repelled is because the individual is off guard and does not understand or acknowledge what can be done.

So Precious Ones, We appreciate deeply any Call you make

for the use of the Sacred Fire, but We are constantly drawing more Electronic Force into the Water Element of the Planet in order to keep the supply of Pure Energy sustained to help mankind, through the Powers of Nature, go on to Victorious Accomplishment. Any time there is a disturbance in your emotional body, *call to Me and demand the Violet Consuming Flame pass through you, or through the substance of your emotional body, with the Power of My Love of the Sacred Fire by which I purify the Water Element of the Earth*—and you will find feelings that are either of tension or discord of any kind, the moment you call for My Purifying Flame to come into the energy of your emotional body, you will find the energy in your emotional body purified and released from the heaviness and the impurity that makes the struggle of the outer self.

While “I AM” the Director of the Water Element and the Beings of the Water Element in the people of Earth, yet “I AM” a Being of the Sacred Fire; and it is by My use of the Sacred Fire that I direct and control the Beings of the Water Element—and so can you. You are a Being of the Sacred Fire, and you control the energy in your feeling world by your own Flame of Life from your “Presence,” through your Higher Mental Body, through the Unfed Flame in your Heart. So regardless of what substance needs to be controlled, it has to be controlled by the Sacred Fire Element.

So become aware of the full Knowledge of all the Sacred Fire means to the Children of Earth, and then bless all the Beings of all the Elements with the Authority, Purity, and Perfection of all the Sacred Fire means, so that you may use of the other Elements whatever concentration you require without ever subjecting yourselves to discord or danger of the sinister force.

Just go forward and be happy, and don’t yield to one thing that wants to make you accept the opinions and limitations of the outer world as being in command of any of the activities around you, which you have a right to use to compel Freedom at your Conscious Command.

Within the Water Element in the oceans of the World there are many, many, many varieties of Life. Some of them you would

scarcely believe could ever be in existence, My Dear Ones. If you will *call the Liquid Electronic Essence of Eternal, Invincible Purity from the Great Central Sun into all form and all substance in all the Water Element of the Planet where that substance is not pure and perfect, and you demand the Flame of Purity enter into that,* you will give Us much, much assistance. You cannot give great Purity to the Water Element of this Planet without automatically purifying the energy in your own emotional world.

Remember We have said often: when you always hold that great Inner Peace with calm Power inside of you, when That is built to a certain intensity, you may walk on the water, you may command the System, you may compel Precipitation come forth, and you may walk in the midst of fire unharmed. Now that depends on Purity, on Protection, on Obedience, and on Harmony; then by Conscious Command will you find the Beings of all the Elements not only your willing servants and cooperators, but willing to fulfill your slightest desire in bringing forth Greater Perfection.

Great has been your service, Precious Ones, to the Dominion of Canada! Great has been the Outpouring in the last twenty-four hours alone to the Western Coast of America; and since the Great Ones have continually reminded you of the Powers of the Sacred Fire, I remind you of the Powers of the Sacred Fire because I use Them to control the Water Element—and It responds to Love perhaps the quickest of almost anything I know. When the Master Jesus said to the energy in the waves of the sea, *“Peace, be still,”* He sent out the Flame of Gold and Pink from His Heart which was His Great Power of Love and His Feeling of Authority over all energy. When that Flash of Flame went forth into the Water Element, the waves were stilled and they obeyed Him, and so can it be with you. If things come back again and again to disturb you, say, *“Peace, be still! I command it by the Flame of the Great Great Silence!”* Now when things disturb you, whether that be in your feeling world or in your mental world or your physical world, matters not. When you use that Command: *“In the Name of the ‘Mighty I AM Presence,’ I say, PEACE, BE STILL, by the Power of the Great Great Silence!”*—there abides the individual Focus of

the Activities of the Sacred Fire in the Great Central Sun to this System of Worlds. When you command in the Name of that "Presence," you are Ambassadors of Its Full Power and Authority in the physical octave. When you command That come forth and fulfill the Divine Plan, it must be so.

In those Statements will there be Light: "Peace, be still," and the Statement of Beloved Jesus, " 'I AM' come to bring you Life and bring It more abundantly!" Well, We come for the same purpose. We come to bring you more of the Energy of the Sacred Fire whenever We come, and regardless of who it is or what it is, the Gift We give is always some Action of the Fire Element to control the activities of the other Elements and hold that energy balanced in constructive action, until Permanent Perfection is compelled into outer action.

Now even the Beloved Virgo, while She is the Director of the Beings of the Earth Element, yet She Herself is a Being of the Sacred Fire, and the Mighty Aries is too. While We are Directors of a Special Element of the Beings of that Element, We are also the Focus and the Authority and the Power of the Sacred Fire. Now when you demand the Great Cosmic Christ Flame of Eternal, Invincible Purity of the Great Great Silence, then if you will still the outer, the manifestation should come forth as easily as breathing. And when things do not work easily for you, Precious Ones, don't struggle against them. Still that outer and say, "*Peace, be still, by the Power of the Great Great Silence,*" and then if you feel the Stillness within, then give your Decrees, hold your picture and move into action. You will find everything will work out more harmoniously and you will feel cooperation through the use of the Fire Element with everything you contact, and with all Beings of all Elements, because all the Beings of every Element know that the Being of the Sacred Fire is their Master and they must obey that Command.

When you recognize yourself as a Being of the Victory of the Love of the Sacred Fire, of the Victory of the Purity of the Sacred Fire, then in the Name of that "Presence," you can Command the Beings of the Elements to purify what you will and produce Perfection at your Conscious Command, and you will find they will

soon automatically come into loving cooperation with you wherever you move, just because they are more comfortable in the feeling of your love and your peace than they are serving the rest of mankind who are in such discord.

So through the Water Element sometimes passes a Flame that purifies the substance within the oceans of the Planet and stays there like a current within a current, in sustained action, to hold balance by continually consuming a certain proportion of the increasing discord in order that Divine Order may come about and mankind have opportunity to make conscious effort to cooperate with the Great Divine Plan of Life.

I thank you for this opportunity, and as you have floated along, the Great Cosmic Flame of Pink and Gold and Violet and Blue have interpenetrated the ship—yourselves and all upon it and within it—and have sent forth Their Purifying Essence into the Water Element. I might describe that Flame as you would see changeable silk. You have seen silk woven in two colors and in one light it looks one color and in another light another color; well just so do those Flames play through and around any substance or through the element where We direct It to consume and keep in balanced action a certain proportion of the energy of the Water Element, or wherever We direct It in order to keep the Planet itself in balanced action in its own orbit in harmonious relationship with the other Planets in the System. So that is the Action of My Love. If you remember, not so long ago I made a certain Statement—and I keep My Word. I am making the Statement again: When a certain proportion of mankind is determined to again start a holocaust of destruction, if you will *call My Flame into the Water Element and into the brains and bodies which contain the Water Element of which "I AM" the Director*, I think We will have some satisfactory results in the blocking of some of their plans—and incidentally, they will have to learn a few lessons.

Purity is the demand of Life, and Balance is the Law of Action, and Love is the Directing Intelligence to produce Perfection. We use them all and We are the Owners of That which We call forth when, by your Free Will, as part of mankind, you demand the Purification on this Earth of everything concerned with My

Element. If you will *demand the Purification of the waters of this Planet by the Great Cosmic Violet Consuming Flame and Blue Lightning of Cosmic Purity*, it will help much the Powers of Nature. When you demand the Purification of the energy in mankind's feeling world, that too will shut off human desire and compel the awakening of the outer consciousness to obedience and the Great Law's requirements to produce Perfection and come forward in constructive action.

Thank you for your presence, and just remember, if you want the Water Element completely purified, We can do it. You will find, Precious Ones, if you want the bodies of mankind purified in their feeling world, demand it of Me, and I will see that great Help comes to answer your Calls, and evil shall die before it can act. With My Love and Eternal Gratitude for this opportunity, may you be blessed by the Explanation I have given and enjoy the greater sense of Dominion. I thank you.

GEM OF LIGHT

Beloved Neptune

Call for the water in Lake Michigan to be charged with Light-Substance to pour forth and cleanse this city of every destructive force and keep this city purified of all discordant substance. Charge it with the Consuming Power of the Violet Consuming Flame to consume all blight, vermin, and all that is less than Perfection.
