The lazy human doesn't want to get up and give these Decrees with enough dynamic force to shatter the shell of limitation that has bound mankind for centuries; but you can't purify the world with a pussy-foot wishing for something when you've got to have Blue Lightning to crack the shell that sets the Life Stream free.

See that these Decree records go on in every Class, so everybody all over the world decrees at the same speed, with the same Power, and the same Decrees if we want Protection against the world and the world's mass evil which intends to do things that I will not even put into words. Now I know more than all of you put together; and I know that if this thing does not go forth in time—and that means before November—then everybody's going to have to face the holocaust that we don't want.

So I ask you to steam your Groups up like they were Blue Lightning; and if you don't feel physically like doing it, let somebody else in the Group stand up and do it.
